

Wisconsin FAASTeam presents:

Mastering the Art of Instrument Navigation 'Night IFR': IMC Club Green Bay

Safe instrument flying is a matter of mitigating risk, personal minimums and standard operating procedures. If you have and use sound judgment, establish personal minimums and good procedures, you can enjoy a long and successful career of instrument flying. However, the training program that you employ can make the difference between success or failure in your instrument flying endeavors. The IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Safety and proficiency are developed through education and experience. Don't miss this meeting and learn how you can use real world scenarios to increase your level of safety. An instrument rating is not required for attendance.

Optional event - tour of the KGRB control tower. Those who are interested should be in the airport lobby by the boat display at 6 pm.

Directions: IMC Club Meeting will be held upstairs at JetAir. Optional KGRB tower tour at 6 pm - meet in the main airport lobby by boat display

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
